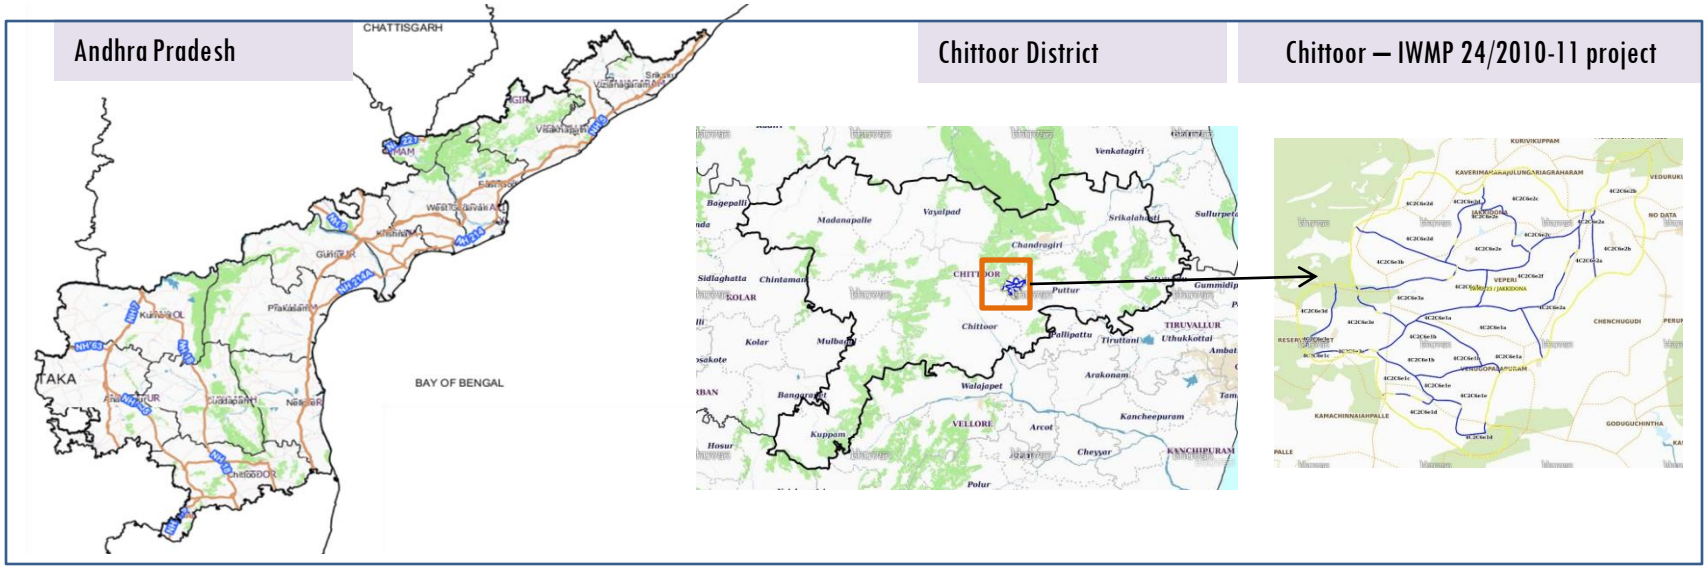
CONTENTS

EXECUTIVE SUMMARY

- Integrated Watersheds Management Project (IWMP) is a flagship programme of Department of Land Resources (DoLR), Ministry of Rural Development (MRD).
- National Remote Sensing Centre (NRSC), ISRO has designed and developed Bhuvan Geo-ICT Web portal tools namely – Srishti and Drishti for monitoring and evaluation of IWMP watersheds. It uses high spatial and temporal resolution sensors viz., Carto-1/2 (2.5 m) , LISS-IV(5.8 m color).
- Current summary report gives details of Project– IWMP-24/2010-11, Chittoor District of Andhra Pradesh. The total geographical area of the project is 3,722 ha. It comprises of 8 micro watersheds.
- In the project area 149 Drishti photos were uploaded showing all water harvesting structures of check dams/Rock fill dam, recharge pits etc,.
- Project area as per image analysis has witnessed distinguishable increase in farm ponds, showing new farm ponds or dug out pits and check dams and drainage treatments with 3 ha increase in the area.
- Major percentage i.e. 58 % is covered by the agriculture, 22 % is covered by scrubland and 7 % is covered by plantation and remaining by other land use classes.

PROJECT : CHITTOOR – IWMP-24/2010-11
DISTRICT : CHITTOOR , STATE : ANDHRA PRADESH

- The study area falls in Kalikiri Mandal of Chittoor district of Andhra Pradesh state. The total geographical area of the project is 3,722 ha. It comprises of 8 micro watersheds. Location Map of the study area is shown in Figure below. Analysis is done for 2010-11 (T0) period (***Batch -II***) projects taking 2018-19 (T5) period satellite images



- The climate of the district is dry and healthy. Out of 66 mandals in the district, 31 are upland mandals which are located in Madanapalle division and are comparatively cooler than the eastern mandals except Chittoor mandal where the climate is moderate. December and January are the coldest months when the mean maximum temperature will be around 26.40 °C, May is the hottest month with the mean daily maximum temperature rising above 40 °C.
- The district receive 83.62 percent of rainfall during South-West monsoon and North-West monsoon period, the rainfall is nominal in summer. On an average the district receives more than 50 percent of rainfall during North- East monsoon.

MONITORING IN THE PROJECT AREA

Site Wise Changes in the Project

- Impacts of the activities carried out are presented through combination of Drishti and Srishti captures.
- T0 is the baseline period before implementation (2010-11) and T5 is 2018-19 period for monitoring.
- Captures are also provided wherever changes are observed in satellite images, that may match expected activity related impact, even though they don't have Drishti report yet.

MONITORING IN THE PROJECT AREA

Land use and Land cover Changes in the Project

- Change in land use and land cover form T0 to T5 are analyzed in terms of built up, mining/dump, agriculture, plantation- horticulture, forest, barren rocky waterbody-streams/river/reservoir and waterbody –ponds.
- Captures are also provided wherever changes are observed in satellite images, that may match expected activity related impact, even though they don't have Drishti report yet.
- The result obtained for the period T0 to T5 are given in the change matrix table.
- In matrix table column represents the T0 (2010-11) and row represents the T5 (2018-19)

Table showing change matrix depicting Land cover transitions during study period-2010-11 to 2014-15

Land cover	Monitoring period (T1)										Units in Hectares
T0	Built up	Mining/ dump	Agriculture	Plantation Horticulture	Forest	Forest Plantation	Barren Rocky	Scrub	Waterbody-Streams/River	Water body Ponds	Grand Total
Built up	65.10										**65.10**
Mining/dump		12.31								0.03	**12.34**
Agriculture	7.12	2.29	2067.99	17.54						10.87	**2105.82**
Plantation Horticulture			18.10	225.77						0.13	**244.00**
Forest					8.12						**8.12**
Forest Plantation											
Barren Rocky							89.19				**89.19**
Scrub	1.11	13.09	52.96	2.92				930.94		4.68	**1005.71**
Waterbody-Streams/River									9.27		**9.27**
Waterbody – Ponds			4.34							178.97	**183.31**
Grand Total	**73.33**	**27.70**	**2143.39**	**246.23**	**8.12**		**89.19**	**930.94**	**9.27**	**194.69**	**3722.86**

- In matrix table diagonal elements represent the both periods in the same class and off diagonal elements represents change in between the classes.
- In T0 37 ha of the agriculture area has decreased and it is converted into Built-up, mining/dump, plantation and water body in T1.
- In T1 75 ha of the agriculture area has increased from plantation and scrubland of T0, and overall 37 ha of the agriculture area has been increased.
- The additional agriculture are coming from waterbody in T1 represents seasonal agriculture.

Table showing change matrix depicting Land cover transitions during study period-2014-15 to 2015-16

Land cover	Monitoring period (T2)										Units in Hectares
T1	Built up	Mining/ dump	Agriculture	Plantation Horticulture	Forest	Forest Plantation	Barren Rocky	Scrub	Waterbody-Streams/River	Water body Ponds	Grand Total
Built up	73.33										**73.33**
Mining/dump		27.50								0.20	**27.70**
Agriculture	1.23	1.01	2080.35	23.19						37.62	**2143.39**

Grand Total	**76.89**	**36.04**	**2178.82**	**265.73**	**8.12**		**89.19**	**820.86**	**9.27**	**237.95**	**3722.86**

• In matrix table diagonal elements represent the both periods in the same class and off diagonal elements represents change in between the classes.

• In T4 13 ha of the agriculture area has decreased and it is converted into Built-up, plantation and water body in T5.

• In T5 20 ha of the agriculture area has increased from scrubland and water body of T4, and overall 6.9 ha of the agriculture area has been increased.

• The additional agriculture are coming from waterbody in T5 represents seasonal agriculture.

Conclusion

1. DPR of the project is uploaded on to Bhuvan Portal.
2. The LULC shows that there is an increase in Crop land, Built up area, Reservoir / Tanks & decrease in Scrubland as presented in the change matrix for different years.
3. There is an increase of 3 Hectares in Reservoir / Tanks area as compared between baseline LU/LC data 2009-10 (T0) & 2017-18 (T5) years.
4. There is an increase of 07, 138, 19 & 11 Hectares From T0 to T1, T2-T3, T3 to T4 & T4-T5 respectively and overall decrease of 120 Hectares in Crop land area as compared between baseline LU/LC data 2009-10 (T0) & 2017-18 (T5) years.
5. There is an increase of 52 ha of the Plantation/Horticulture area has been increased between 2009-10 (t0) & 2017-18 (T5) years.
6. There is a decrease of 231 Hectares in Scrubland area as compared between 2009-10 (T0) & 2017-18 (T5) years.
7. Farm ponds (0) is visible on IWMP Bhuvan Srishti portal out of Bhuvan Drishti photo of Farm ponds (1) verified from the portal.
